FDD Abstract GDR METAL IMPORT REQUIREMENTS (1p; German; 

25X1C

25X1X

This one-page document lists the metal import requirements for the GDR to enable them to complete the 1951 reparation order. The list is divided into three parts. The total requirements, the requirements for Soviet Corporations (SAG's), and the requirements for GDR enterprises. Each part is sub-divided into total requirements for the July-September period, and monthly requirements for July, August and September.

The list of required materials reads: Structural steel - 18 millimeters, structural steel - 20 millimeters and over, steel bars, total; heavy sheet, ~~heavy~~ medium sheet, thin sheet, high-speed steel sheet, total; tubes; rolling material total; non-ferrous metal.

The total requirements of rolling mill materials amount to 15,010.72 tons and of non-ferrous material to 7.33 tons.
